EDUCATION

University of Wollongong(UOW), Australia | SIM Global Education (SIMGE), Singapore

B.Sc. Computer Science – AI and Big Data Management

Oct 2024 – Oct 2026

SIM Global Education (SIMGE) | Singapore

Diploma in Information Technology

Oct 2023 – Oct 2024

WORK EXPERIENCE

IT Support / Junior Data Engineer (Remote) — B8 ICT Solutions

November 2025 – Present

- Queried, maintained, and monitored SQL Server / Azure SQL databases supporting internal systems, including data integrity checks, scheduled backups, and performance tuning.
- Wrote Python and PowerShell scripts to extract, clean, and transform data from the ticketing system and internal logs into structured reports for the team and management.
- Automated recurring data workflows, including scheduled data extracts, log aggregation, and report generation, reducing manual reporting effort and turnaround time.
- Supported deployment and monitoring of cloud infrastructure on Microsoft Azure, helping maintain system uptime and performance.
- Administered Windows and Linux systems, including user provisioning, permissions, patching, and routine maintenance.
- Delivered remote IT support to end users, diagnosing and resolving hardware, software, network, and account access issues through a ticketing system.

Junior Developer (Remote) — MSME by G3G

April 2024 – September 2025

- Assisted the development team in building and testing features for internal and client-facing web applications using JavaScript, TypeScript, React, and Node.js/Express.
- Helped write and troubleshoot SQL queries against MySQL and PostgreSQL databases under senior developer guidance.
- Identified and fixed minor bugs flagged during QA testing, and verified fixes before handoff.
- Took part in peer code reviews and followed Git/GitHub version control practices within an Agile/Scrum team.
- Supported the team in testing and documenting REST API endpoints used across the application.
- Helped maintain internal developer guides and onboarding documentation for new team members.

PROJECTS

Krewby — Workforce Management SaaS Platform — Final Year Project – Team Lead Engineer / Database Engineer

- <https://github.com/HeinThuraMin/Krewby-Workforce-Management-SaaS-Platform.git>
- Led a cross-functional team of engineers as Team Lead, assigning development tasks, conducting code reviews, and coordinating sprint planning and delivery timelines across frontend, backend, and database workstreams.
- Mentored team members on Git/GitHub workflows and Prisma/PostgreSQL schema design, and served as the primary point of contact for technical decision-making throughout the project.
- Built a multi-outlet workforce management platform for F&B/service businesses in Singapore, covering shift scheduling, leave approval, staff rostering, and timesheet tracking for regular and casual staff.
- Developed frontend with React 19 + Vite (deployed on Vercel) and backend with Node.js, Express, and Prisma (deployed on Render), using Supabase PostgreSQL as the database.
- Integrated an AI assistant (OpenAI GPT-4o-mini) for chat, shift review, and weekly schedule review, plus Azure AI Foundry RAG for policy Q&A over internal documents.
- Built AI-assisted auto-generation of weekly schedules with skill-level matching and difficulty settings.

Shibalnu — Online Fundraising Platform — University Group Project (CSIT314) – Project Coordinator / Full-Stack Developer

- <https://github.com/HeinThuraMin/Shibalnu-Online-Fundraising-Platform.git>
- Designed and built a GoFundMe-style fundraising platform matching fund raisers to donees, supporting Admin, Fund Raiser, Donee, and Platform Management roles, activity tracking, search/filtering, and reporting.
- Led project coordination and sprint planning for a 5-member team using Agile/Scrum and Taiga for backlog and sprint management.
- Produced UML use case diagrams and ERD/database design; contributed to full-stack implementation and report documentation.

- Built with Next.js, TypeScript, and Supabase (PostgreSQL).

Emochi — Emotional AI Companion — Hackathon Project – UI & Database Integration

- <https://github.com/HeinThuraMin/Emochi-Emotional-AI-Companion.git>
- Won the Community Choice Award and Microsoft Stack Award.
- Built an app that represents user feelings as eight debating AI characters, with a judge agent ("Wisey") synthesizing a single balanced next step.
- Implemented on Azure AI Foundry (8 agents + shared knowledge base) with Microsoft Account sign-in and Microsoft SQL Server.

Hand Gesture Alphabet Learning System — Solo Project

- Built a web app that helps children learn sign language alphabets through interactive tutorials, AI-powered hand gesture recognition, and mini-games.
- **Developed frontend** with React.js and Tailwind CSS, backend with Node.js and Express.js, MySQL for storage, and MediaPipe Hands with TensorFlow for real-time gesture recognition.

Taxi-v3 Reinforcement Learning Agent — School Team Project – Model Training & Testing

- <https://github.com/HeinThuraMin/csci323-drive-a-taxi.git>
- Trained a Q-learning agent in OpenAI Gymnasium's Taxi-v3 environment to learn optimal passenger pickup/drop-off routes through exploration and reward-based learning.
- Built with Python, Gymnasium, NumPy, Matplotlib, and tqdm.

Garbage Classification Using AI — Team Project – Dataset Management & Testing

- https://github.com/HeinThuraMin/Garbage-Classification_.git
- Built a CNN-based image classifier with TensorFlow to categorize waste images to support automated recycling sorting.
- Managed dataset preparation/cleaning and conducted model testing.

CERTIFICATIONS

- Google Data Analytics Specialization — Google / Coursera
- IBM Data Engineering Professional Certificate
- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect - Associate
- Introduction to Artificial Intelligence — Simbolo (2-month course, 2023)
- Oracle Database Foundation — Simbolo (2-month course, Aug 2023)

SKILLS

Languages: **JavaScript, TypeScript, Python, SQL, PowerShell**

IT Systems & Cloud: **Windows Administration, Linux Administration, Microsoft Azure**

Frameworks & Backend: **React.js, Node.js, Express.js, Prisma, REST APIs**

Databases: **MySQL, PostgreSQL**

Tools & Practices: **Git/GitHub, Agile/Scrum, Data Analysis, Analytical Skills**

AI/ML & Additional: **TensorFlow, Reinforcement Learning (Q-learning), RAG, OpenAI GPT-4o-mini API, Next.js, Microsoft SQL Server**
